

Renting the Cessna T182T

To rent the C-T182T from our fleet, you must complete the self-study ground school, pass the type check exam and complete a checkout flight with an approved CFC Flight Instructor. Once you have submitted your type check exam, it may take up to a full week to be scheduled for a checkout flight.

1. The Pilot Operating Handbook (POH) was created by Cessna to provide technical information and procedures for the T182T.
2. The Aircraft Operating Manual (AOM) was prepared by Calgary Flying Club staff to provide information on how the T182T is to be operated by CFC members and staff.
3. To prepare for the aircraft checkout, go through the presentation, with the AOM and the POH as references.
4. Complete the type check exam, using the ground school presentation, AOM and POH as references, and submit the completed type check exam to cfcdispatch@calgaryflyingclub.com
5. After reviewing your exam, you will be contacted to set up a time to start your checkout.
